

# Temperature Sensor for Digital Clocks (V1)

- Wired Directly to any Sapling 3200 or 3300 Digital Clock
- Allows clock to display temperature in Fahrenheit or Celsius
- Sensor packaged in a small, inconspicuous, water resistant compartment

## Specifications:

**Dimensions:** Length = 1.6" (4cm)  
Width = 1.6" (4cm)  
Depth = 0.6" (1.5cm)

**Sensing Temperature:** -67°F - 302°F  
-55°C - 150°C

**Operating Temperature:** -67°F - 302°F  
-55°C - 150°C

**Accuracy:** ±1.8°F (±1°C)

**Ordering Information:** SBD-TEMP-000-0

**Standard Wire Length:** 72" (1.83m)

**Power:** The Sensor is powered by the digital clock

**Case Material:** Acrylonitrile Butadiene Styrene (ABS)

**Color:** Off-white
